

Division of Pediatric Hematology and Oncology, Department of Pediatrics and Adolescent Medicine,
University Medical Center Freiburg, Germany

We are a mid-sized German university-based pediatric oncology center with an active stem cell transplant service. Our special research focus is on rare leukemias and bone marrow failures; we host the Coordinating Study Center (CSC) of the European Working Group of MDS and JMML (EWOG-MDS) as well as the CSC of EWOG-SAA. Other research groups in the division work on soft tissue sarcoma, vascular disorders, brain tumors and in hemostasis. We are member of the German Cancer Consortium(DKTK).

Due to recent promotions of staff members we currently have openings. We are looking for junior staff members (“Arzt in Weiterbildung”) interested in pediatric hematology, oncology, hemostasis or stem cell transplantation, as well as for board certified pediatricians specialized in clinical care and/or research in cancer. Candidates must have excellent communication skills, be fluent in German and have a team spirit.

Application deadline: May 1, 2017
